Acta Informatica

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt, from the relevant protective laws and regulations and therefore free for general use.

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contacts Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fernsehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benützte Kopie dient gewerblichen Zwecken gem. § 54 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothektantieme und dem Fotokopieraufkommen mit einbezogen werden. Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestr. 49, D-8000 München 2.

Die Wiedergabe von Gebrauchsnamen, Handelsnamen, Warenbezeichnungen usw. in dieser Zeitschrift berechtigt auch ohne besondere Kennzeichnung nicht zu der Annahme, daß solche Namen im Sinne der Warenzeichen- und Markenschutz-Gesetzgebung als frei zu betrachten wären und daher von jedermann benutzt werden dürften.

Instructions to Authors

1. General

Papers submitted for publication may be written in English, French, or German.

Manuscripts must be in their **final form,** typed on one side of each sheet only, with double spacing and wide margins. To speed up editorial scrutiny, they should be submitted in triplicate. One of them should be fully marked according to the recommendations under 3. Please include a "Note for the Printer" explaining the markings used in accordance with the suggestions overleaf. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.

To speed up publication, authors will receive **only one set of proofs** (provisionally numbered page proofs). Authors are requested to **correct typographical errors only;** they will be charged for corrections involving changes, additions, or deletions in the original manuscript.

Each paper should be preceded by a **short summary** in English. If the paper is not in English, an English title is required.

All **figures** are to be numbered consecutively and should be submitted on separate sheets. They should be drawn in India ink in clean uniform lines. They should be about twice the size of the finished illustration. Inscriptions should allow for the numeral 1, for example, to be about 2 mm high in the final version (i.e., 4 mm $\times \frac{1}{2}$ reduction). The author should indicate in the left margin of the manuscript where figures, tables, or diagrams are to be inserted.

Footnotes, others than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article).

On the first page of the manuscript please give a **running head** (short title), no longer than 72 letters including spaces.

References cited should be listed at the end of the manuscript. Please arrange them in alphabetical order under the first author's name, number them, and cite by number only in the text. Works referred to in the text should be cited in accordance with the following examples:

1. Dijkstra, E.W.: Notes on structured programming. Technological University Eindhoven, TH Report 70-WSK 03, April 1970
2. Gries, D.: Describing an algorithm by Hopcroft. Acta Informat. **2**, 97–109 (1973)
3. Hoare, C.A.R.: Procedures and parameters: An axiomatic approach. In: Symposium on semantics of algorithmic languages (E. Engeler, ed.), Lecture Notes in Mathematics, Vol. 188, pp. 102–116. Berlin-Heidelberg-New York: Springer 1971
4. Knuth, D.E.: The art of computer programming, Vol. 1: Fundamental algorithms, 2nd ed. Reading, Mass.: Addison-Wesley 1973
5. Randell, B.: Operating systems: The problems of performance and reliability. Proc. IFIP Congress 1971, Ljubljana, pp. 100–109. Amsterdam: North-Holland 1971

2. Special Alphabets or Typefaces

Standard type (in boldface)	**A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z** **a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z**
Script	$\mathcal{A}, \mathcal{B}, \mathcal{C}, \mathcal{D}, \mathcal{E}, \mathcal{F}, \mathcal{G}, \mathcal{H}, \mathcal{I}, \mathcal{J}, \mathcal{K}, \mathcal{L}, \mathcal{M}, \mathcal{N}, \mathcal{O}, \mathcal{P}, \mathcal{Q}, \mathcal{R}, \mathcal{S}, \mathcal{T}, \mathcal{U}, \mathcal{V}, \mathcal{W}, \mathcal{X}, \mathcal{Y}, \mathcal{Z}$ $a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z$
Sanserif*	A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z
Gothic	$\mathfrak{A}, \mathfrak{B}, \mathfrak{C}, \mathfrak{D}, \mathfrak{E}, \mathfrak{F}, \mathfrak{G}, \mathfrak{H}, \mathfrak{I}, \mathfrak{J}, \mathfrak{K}, \mathfrak{L}, \mathfrak{M}, \mathfrak{N}, \mathfrak{O}, \mathfrak{P}, \mathfrak{Q}, \mathfrak{R}, \mathfrak{S}, \mathfrak{T}, \mathfrak{U}, \mathfrak{V}, \mathfrak{W}, \mathfrak{X}, \mathfrak{Y}, \mathfrak{Z}$ $\mathfrak{a}, \mathfrak{b}, \mathfrak{c}, \mathfrak{d}, \mathfrak{e}, \mathfrak{f}, \mathfrak{g}, \mathfrak{h}, \mathfrak{i}, \mathfrak{j}, \mathfrak{k}, \mathfrak{l}, \mathfrak{m}, \mathfrak{n}, \mathfrak{o}, \mathfrak{p}, \mathfrak{q}, \mathfrak{r}, \mathfrak{s}, \mathfrak{t}, \mathfrak{u}, \mathfrak{v}, \mathfrak{w}, \mathfrak{x}, \mathfrak{y}, \mathfrak{z}$
Special Roman	$\mathbb{A}, \mathbb{B}, \mathbb{C}, \mathbb{D}, \mathbb{E}, \mathbb{F}, \mathbb{G}, \mathbb{H}, \mathbb{I}, \mathbb{J}, \mathbb{K}, \mathbb{L}, \mathbb{M}, \mathbb{N}, \mathbb{O}, \mathbb{P}, \mathbb{Q}, \mathbb{R}, \mathbb{S}, \mathbb{T}, \mathbb{U}, \mathbb{V}, \mathbb{W}, \mathbb{X}, \mathbb{Y}, \mathbb{Z}, \mathbb{1}$
Greek	$\Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega$ $\alpha, \beta, \gamma, \delta, \varepsilon, \zeta, \eta, \theta, \vartheta, \iota, \kappa, \lambda, \mu, \nu, \xi, o, \pi, \rho, \sigma, \tau, \upsilon, \varphi, \phi, \chi, \psi, \omega$

* Also available in boldface.

3. Marking for the Printer

Underlining for special alphabets and typefaces should be done according to the following code:

black:	italics
brown:	standard type (in boldface) (e.g. headings, word symbols, etc.)
yellow:	upright abbreviations (e.g. Re, Im, log, sin, ord, id, lim, sup, etc.)
green:	Script
wavy line (in black):	Sanserif
blue:	Gothic
red:	Greek
violet:	the numeral 1, and zero (to distinguish them from the small letter *l* and the capital letter *O*)

Lower case letters are to be underlined once, upper case letters twice, in the proper color.

The words **"Theorem", "Lemma", "Corollary", "Proposition"** etc. are normally printed in **boldface,** followed by the formulation in *italics.*
The words "*Proof*", "*Remark*", "*Definition*", "*Note*" etc. are printed in *italics* with the formulation in ordinary typeface.
Letters in formulae are normally printed in *italics*, figures in ordinary typeface.

Word symbols in programming languages should be marked for Sanserif.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b\uparrow$, $a\Downarrow$. Spacing of indices and exponents must be specially indicated ($A_m{}^n{}_n{}^m$) otherwise they will be set (A_{mn}^{nm}).

The following are frequently confused:

$\cup$, $\mathbf{u}$, $\bigcup$, U; $\circ, o, O, 0$; $\times, x, X, \kappa$; $\vee, v, \nu$; $\theta, \Theta, \phi, \varphi, \Phi, \varnothing, \emptyset$; ψ, Ψ; $\varepsilon, \in$;

a', a^1; the symbol *a* and the indefinite article a;

also the handwritten Roman letters:

c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; x, X; z, Z;

Please take care to distinguish them in some way.

4. Preferred Forms

preferred form	instead of	preferred form	instead of
$A^*, \tilde{b}, \gamma', \mathfrak{v}, \mathbf{v}$	$\bar{A}, \hat{b}, \check{\gamma}, \vec{v}$	$f: A \to B$	$A \xrightarrow{f} B$
lim sup, lim inf	$\overline{\lim}, \underline{\lim}$		
$\exp(-(x^2+y^2)/a^2)$	$e^{-\frac{x^2+y^2}{a^2}}$	$\dfrac{\cos(1/x)}{(a+b/x)^{1/2}}$	$\dfrac{\cos\frac{1}{x}}{\sqrt{a+\frac{b}{x}}}$
f^{-1}	$\overset{-1}{f}$

Courses and Lectures

No. 265

Multi-User Communication Systems

Edited by **G. Longo,** Università di Trieste

1981. 30 figures. IV, 259 pages.
Soft cover DM 45,–, AS 322,–
ISBN 3-211-81612-7

The traditional object of information theory is the one-source one-channel system, but since Shannon's pioneering work also more complicated two-source two-channel systems have been considered. These systems model realistic communication networks which are often met in the practice of data transmission and computer communication. The course is devoted to the information-theoretical analysis of the multi-user systems as well as to the practical implementation of such systems. Moreover, multiple-access communication systems will be dealt with in detail. The emphasis is on the possibility of eliminating the noise and interference effects from communication and data processing.

No. 266

Analysis and Design of Algorithms in Combinatorial Optimization

Edited by **G. Ausiello** and **M. Lucertini,**
IASI – CNR, Istituto di Automatica, Università di Roma

1981. 22 figures. VII, 209 pages.
Soft cover DM 52,–, AS 372,–
ISBN 3-211-81626-7

The course was devoted to the study of problems of combinatorial optimization from several points of view: abstract classification of combinatorial problems under their structural and complexity properties, characterization of the approximation properties, performance of specific classes of (exact and approximate) algorithms for specific classes of problems.
